

Ser. No.: 10/807,281

Atty. Docket No.: 6579-0622

Art Unit: 3724

Amendment and Reply dated June 8, 2006

In Response to Office Action of March 8, 2006

IN THE CLAIMS:

A presentation of all of the pending claims with their current status indicated follows.

Claims 1-33. (Canceled).

34. (Currently Amended) A razor, in particular for wet shaving, with comprising:
a unitary body ~~comprising~~ having a handle region-(10), a head region-(14) and a neck region-(12) located between the handle region-(10) and the head region-(14), and with
functional components ~~which are~~ at least partly arranged within the unitary body and comprise an electrically operated vibration device-(20) for producing vibrations in the head region and an electrical supply device, having an energy store-(24), for the vibration device (20), the head region having a holding device for an exchangeable blade element and the vibration device being arranged in the ~~region~~ unitary body in proximity of the holding device.

35. (Original) The razor as claimed in claim 34, wherein the vibration device comprises a motor with a flywheel arranged eccentrically in relation to an axis of rotation.

36. (Currently Amended) The razor as claimed in claim 35, wherein the vibration device is arranged in the body in such a way that the vibration of the vibration device during use produces a movement of the cutting edges of the shearing blades of the exchangeable blade element, which runs substantially in ~~the~~ a plane defined by the cutting edges.

Claims 37-40. (Canceled).

41. (Currently Amended) The razor as claimed in claim 35, wherein the motor and the flywheel are arranged within a sleeve, the ~~extent of which~~ sleeve extending along the axis of rotation [is] more than ~~its extent~~ the sleeve extends perpendicular to the axis of rotation.

42. (Currently Amended) The razor as claimed in claim 34, wherein the vibration device is arranged in a recess in the head region, in ~~the region~~ proximity of the holding device.
